

Sharo Saadi Hassan

Founder & Lead Developer

Experience

Founder & Lead Developer

May 2025 - Present

AI Kurd

Erbil, IQ, Iraq

- **Founded and developed an educational technology platform dedicated to providing AI safety research resources, tutorials, and technical materials in Kurdish and English.**
- **Built and deployed the KurdRoom Progressive Web App (PWA) using modern web technologies and lightweight backend infrastructure.**

Education

Artificial Intelligence - Bachelor's Degree

Salahaddin University - Erbil

2025 - 2029 Erbil, Iraq

Summary

Undergraduate Artificial Intelligence student with strong PyTorch engineering fundamentals seeking Alignment Research Engineer (ARE) roles, research fellowships, and independent grant funding in AI safety. Founder of AI Kurd and KurdRoom PWA. Completed Fast.ai, Harvard CS50, and the Centre for Effective Altruism Virtual Program, with a technical focus on Mechanistic Interpretability, Transformer architectures, and generative model internals.

Skills

Technical Leadership

AI Safety Research

Git, Linux/Bash,
RunPod & CUDA

Progressive Web App
(PWA) & Web Stack

Python, C++, C, SQL

Mechanistic
Interpretability (
TransformerLens)

Generative AI
(Diffusion, VAEs, U-Net)

Languages

Arabic		Elementary
Persian		Native
English		Fluent
Kurdish		Native

Certifications

- Effective Altruism Virtual Program (AI Safety & Cause Prioritization)
- Practical Deep Learning for Coders: Part 2 (Advanced Generative Models)
- CS50: Introduction to Computer Science

Accomplishments

- Generative Models from Scratch: Implemented end-to-end Latent Diffusion Models (LDMs) in pure PyTorch without high-level library abstractions, building DDIM schedulers, U-Net denoisers, VAEs, and Classifier-Free Guidance.
- Founder & Platform Lead: Built and deployed AI Kurd and the KurdRoom Progressive Web App (PWA) to bridge the technical knowledge gap in AI safety and machine learning across Kurdish and English communities.
- Verified CS & AI Credentials: Completed Harvard's CS50 (Introduction to Computer Science) with edX verification, [Fast.ai](#) Part 2 (Generative Models), and the Centre for Effective Altruism Virtual Program cohort.
